

# Name NOAA's New Ship

*Ship dragging a trawl net -  
sensors help keep the net open*

NOAA's new Fisheries Survey Vessel, currently known as FSV #2, will directly support the primary goals of NOAA Fisheries: to rebuild and maintain sustainable fisheries, to promote the recovery of protected species, and to protect and maintain the health of coastal marine habitats. More specifically, FSV #2 will conduct fisheries and oceanographic research in support of NOAA's Northeast Fisheries Science Center, sailing from its home port in Woods Hole, Massachusetts.
